

# **SRIDEVI T**

## **Full Stack Developer**

I build dynamic and scalable web applications from front-end to back-end. My focus is on creating efficient, secure, and user-friendly digital experiences using modern technologies.

---

## **About Me**

I am a Full Stack Developer with experience in building end-to-end web applications. I specialize in front-end development using frameworks like React and back-end development with Node.js, Express, and databases like MongoDB and SQLite. My approach emphasizes clean code, scalability, and seamless user experiences. I enjoy turning complex problems into elegant solutions while staying up to date with emerging technologies and best practices in software development.

When I'm not coding, you can find me exploring new tech trends, developing independent projects, or sharing knowledge with the developer community.
